

### B. Claims

Please amend claims 20, 22, 24 and 25 to read as follows. A complete listing of all the claims appears below; this listing replaces all earlier amendments and listings of the claims.

1. (Original) A cosmetic composition containing a silicone resin polymer comprised of M units in combination with Q or T units or both, wherein the number of M units is greater than the number of Q units or T units or combination thereof.

2. (Original) The composition of claim 1 wherein the silicone resin has about 1.1 M units for every Q or T unit or combination thereof.

3. (Original) The composition of claim 1 wherein the silicone resin polymer has about 1.4 M units for every Q or T unit or combination thereof.

4. (Original) The composition of claim 1 wherein the silicone resin polymer has about 1.6 M units for every Q or T unit or combination thereof.

5. (Original) The composition of claim 1 wherein the silicone resin polymer has about 2.0 M units for every Q or T unit or combination thereof.

6. (Original) The composition of claim 1 wherein the silicone resin polymer has about 2.3 M units for every Q or T unit or combination thereof.

7. (Original) The composition of claim 1 wherein the silicone resin polymer has about 2.6 M units for every Q or T unit or combination thereof.

8. (Original) The composition of claim 1 wherein the silicone resin polymer has about 3.0 M units for every Q or T unit or combination thereof.

9. (Original) The composition of claim 1 wherein the silicone resin polymer has hydroxy or alkoxy functional groups.

10. (Original) The composition of claim 1 wherein the silicone resin polymer is a solid at room temperature.

11. (Original) The composition of claim 1 wherein the silicone resin polymer is a liquid at room temperature.

12. (Original) The composition of claim 1 wherein the silicone resin polymer is a semi-solid at room temperature.

13. (Original) The composition of claim 1 wherein the composition additionally comprises another film forming polymer in addition to the silicone resin polymer.

14. (Original) The composition of claim 13 wherein the film forming polymer is a silicone polymer, a polymer of silicone and one or more ethylenically unsaturated monomers or organic groups, or a polymer of one or more ethylenically unsaturated monomers.

15. (Original) The composition of claim 14 wherein the additional film forming polymer is a polymer of silicone and ethylenically unsaturated monomers.

16. (Original) The composition of claim 13 wherein the film forming polymer is a copolymer of silicone and acrylic acid, methacrylic acid, or their simple esters.

17. (Original) The composition of claim 13 wherein the film forming polymer is a silicone gum having a viscosity ranging from about 100,000 to 10,000,000 centistokes at room temperature.

18. (Original) The composition of claim 1 which is a lipstick, eyeshadow, blush, foundation, mascara, eyeliner or concealer.

19. (Original) The composition of claim 1 additionally comprising an oil.

20. (Currently Amended) The composition of claim ~~14~~ 19 wherein the oil is a silicone oil, ester, hydrocarbon, fluorinated oil, or mixtures thereof.

21. (Original) The composition of claim 1 additionally comprising a rheological additive.

22. (Currently Amended) The composition of claim ~~16~~ 21 wherein the rheological additive comprises clay.

23. (Original) A method for improving the finish of a cosmetic composition by formulating such composition with a silicone resin comprised of M units in combination with Q or T units or both, wherein the number of M units in the polymer is greater than the number of Q or T units or combination thereof.

24. (Currently Amended) The method of claim ~~18~~ 23 wherein the finish is improved by increasing shine.

25. (Currently Amended) The method of claim ~~18~~ 23 wherein the finish is improved by improving wear.
